

## OUT IN THE COLD

### Index

- acrylonitrile butadiene styrene 35
- activated sludge 49
- aid provision 3, 59
- air-drops 63
- anaerobic sludge digestion 49
- antifreeze admixtures 56
- asbestos cement 35, 77
  
- boiling water 28, 40
- boreholes 10, 12, 39, 58
- break-pressure tanks 42
- brine pumping 17
  
- chemical disinfection 26
- climate 2–7, 44–5, 59, 70–2
- cold region, definition of 4
- concrete 23–4, 27, 39, 45, 48, 55–60
  
- defrosting pipes 35
- density of materials 77–8
- diesel 21, 59, 64–6
- disease 6, 14, 28–9, 39, 44, 68–9
- disposal of the dead 53
- distribution points 5, 31, 38–9
  
- engines 64
- excreta disposal 7, 14, 44, 47, 49, 53
  
- filtration 26–7
- frost jacking 58
- frozen ground 45–6, 52–3, 56–8, 70
  
- glacial flour 27
- ground storage lakes 24
- groundwater 5, 10, 12, 15, 24
  
- hand-washing 47–9
- handpumps 12, 38
- hailed water 6, 21
- HDPE pipes 33–5, 77, 83
- health problems 6, 10, 14, 39, 68, 70
- honey-bags 47, 53
- hot water 29, 35, 37, 47, 69
- human issues 6, 68
  
- ice control 60
- ice cutting 17
- infiltration galleries 17–19, 21
- insulation 12, 23, 30, 33–5, 39, 55–6, 64
- intakes 17–19
  
- latrines 5–7, 44–8, 53–4
- latrine slabs 45–7, 55–6
- levels of development 4
- lice 29, 69
- logistics 2, 3, 6, 21, 40, 59, 63, 66
  
- material properties 34
- mechanics 64
  
- open defecation 44, 54, 68
  
- pack animals 63
- percolating filters 49
- personal effectiveness 71
- pipe burial 33
- pipe materials 33–5
- polyvinylchloride 33
- ponds 15, 17, 60
- portable aerobic units 51
- properties of snow 9
- pumping 9, 12, 14, 17, 25, 37, 42, 48, 66
- pumps 9, 10, 12, 14, 30, 42–3, 59, 64, 66
  
- rivers 10, 14, 15, 17
- rotating biological contactors 49, 51
- roughing filtration 27
  
- sanitation 2–8, 44, 53–4, 59, 63, 66, 69–70
- sedimentation tanks 9, 26
- septic tanks 51
- sewerage systems 14, 48
- shelter 5–6, 8, 38, 47, 55, 66
- slow sand filters 26
- snow loads 24
- solid waste 6, 53, 54
- spring protection 12
- standpipes 39
- storage tanks 6, 10, 21, 23, 30, 39, 57

## INDEX

- streams 14–15, 17, 19, 39, 60
- surface laid pipes 79–80
- surface water 10, 12, 14–15, 19, 39, 54
  
- tap box 39, 41
- tents 63, 66, 67
- thermal properties 34–5, 77–8
  
- vehicles 64
- viscosity 7, 9, 24, 25, 26, 27
  
- wastewater treatment 47–51
- water
  - density 8
  - distribution 38, 39
  - intakes 19
  - quality 9, 14, 15, 27
  - sources 9–10, 15, 21, 39–40, 60, 73, 76
  - supply 2, 6–8, 39, 66, 73
  - treatment 7, 10, 15, 19, 25, 40, 59, 83
- wells 10
- wind-chill 70
- winterisation studies 5

## Also available in this series:

### **Emergency Sanitation**

*Assessment and programme design*

Peter Harvey, Sohrab Baghri and Bob Reed

This book is designed to assist those involved in planning and implementing emergency sanitation programmes. The main focus of the book is a systematic and structured approach to assessment and programme design. It provides a balance between the hardware (technical) and software (socio-cultural, institutional) aspects of sanitation programmes, and links short-term emergency response to long-term sustainability. The book is relevant to a wide range of emergency situations, including both natural and conflict-induced disasters, and open and closed settings. It is suitable for field technicians, engineers and hygiene promoters, as well as staff at agency headquarters. Included free with each book is a mini CD and an 'aide-memoire' to the process of planning and implementation.

### **Emergency Vector Control Using Chemicals**

Christophe Lacarin and Bob Reed

The control of vectors that transmit diseases in emergencies is critical to the prevention of epidemics. This handbook describes how such vectors can be identified and controlled using chemicals. Aimed at non-specialists such as logisticians, engineers and health workers, it provides advice on identifying the responsible vector, selecting the appropriate control chemical and the means of application, together with advice on planning an implementation programme.

### **Emergency Water Sources**

*Guidelines for selection and treatment*

Sarah House and Bob Reed

These guidelines have been designed to help those involved in the assessment of emergency water sources to collect relevant information in a systematic way, to use this information to select a source or sources and to determine the appropriate level of treatment required to make the water suitable for drinking. The book is relevant to a wide range of emergency situations, including both natural and conflict-induced disasters.
